Education

Pune Institute of Computer Technology — Aug 2023 – Jun 2027
B.E. in Artificial Intelligence and Data Science — *CGPA: 8.56 / 10*

Manere Highschool & Junior College — Jun 2021 – May 2023
HSC (Class XII) — *92.33%*

Vyankateshwara English School — Jun 2020- May 2021
SSC (Class X) — *81.20%*

Technical Skills

Languages: Python, C++, JavaScript , SQL.
ML / AI: PyTorch, TensorFlow, Scikit-learn, LangChain, Langgraph, Pandas, NumPy, NLTK.
Tools: Postman, Git, GitHub, REST APIs, Docker.
Databases: PostgreSQL, MongoDB, MySQL.
Core Subjects: Computer Networks, DBMS, System Design Fundamentals, Data Structures & Algorithms, OOP.

Projects

Campus Placement Records | *React.js, Node.js, PostgreSQL, pgvector, LangChain*

- Built a placement analytics platform by migrating **800+ placement records** and **3,000+ company-skill mappings** into a normalized **PostgreSQL (Neon)** database.
- Developed a **React.js** dashboard with **20+ visualizations**, filtering, and real-time analytics using **Chart.js**.
- Built a **RAG pipeline** with **pgvector** for semantic retrieval and an **LLM-powered chatbot** supporting natural-language queries.

ContextFlow | *Python, LangGraph, LangChain, FastAPI, PyTorch, FAISS*

- Engineered an **enterprise-grade multi-agent AI platform** using **LangGraph** for planning, reasoning, memory, and tool orchestration.
- Designed AI agents with **retrieval, web search, document intelligence, calculator, and database tools** for context-aware task execution.
- Built **FAISS**-based memory pipelines and a scalable **FastAPI + LangChain** backend with LLM integration, human-in-the-loop support, and real-time streaming.

Experience

PICT Neuromesh Lab — Pune, India
Research Intern — *Oct 2025 – Mar 2026*
Researched and implemented end-to-end **3D reconstruction pipelines** utilizing **Structure from Motion (SfM)** and **Multi-View Stereo (MVS)** for high-precision spatial modeling. Integrated **Neural Radiance Fields (NeRF)** to enable photorealistic view synthesis and advanced volumetric scene representation from sparse image sets. Developed deep learning-based mesh refinement techniques to improve the density and accuracy of **3D point clouds** in complex environments.

Certifications

Google for Developers — Jan 2026 – Mar 2026
AI-ML Virtual Internship— AICTE EduSkills — *Virtual*

Introduction to JIRA — Jan 2025
Simplilearn SkillUp — *Online*
